MINING INDABA SUSTAINABLE DEVELOPMENT DAY

Tuesday, February 6th, 2018

7am – 9am (light breakfast available)

The Sustainability stage (stage B),
Cape Town International Convention Centre

CANADA INVITES YOU TO OUR 9TH ANNUAL FORUM:

A MOMENT FOR LEADERSHIP ON RESPONSIBLE SOURCING FOR METALS AND MINERALS (FROM MINE TO PRODUCT)

With downstream jewelers, technology, green energy and others driving increased focus on the traceability and sustainability of products, all the way up the value chain to mines, the sector is poised to demonstrate what responsible minerals sourcing means in practice.

- What's possible within the complex market of commodities where metals and minerals may originate from multiple sources and are increasingly recycled?
- What are the innovations needed for traceability to be realized and lead to lasting sustainability impacts?

This panel will explore current approaches within the value chain that allow manufacturers, retailers and consumers to address these challenges and demonstrate understand that the metals and minerals in their products are mined using responsible practices.
